## TEMPLE 337 Cabinet

*Our smallest Model 170 Controller Cabinet*

### Description

The Temple 337 Cabinet was designed to meet customer requests for a smaller, more economical Traffic Control Cabinet for use with the 170 Controller.

The Temple 337 Cabinet is a durable, weatherproof enclosure that can be mounted on a pedestal, on top of a post, or side mounted to a pole. The cabinet shell is manufactured from 0.125" thick aluminum alloy. Two full-size doors, front and rear, allow easy access to any part of the cabinet. The Temple 337 Cabinet is built to basic CalTrans specifications.

The Internal Rack Assembly consists of the following components:

- 1 Power Distribution Assembly w/ integral power supply,
- 1 Input File,
- 1 Output File,
- 1 slot for 210 Monitor,
- 1 slot for 204 Flasher Modules,
- 3 receptacles for 430 Relays,
- 6 receptacles for flash programming.

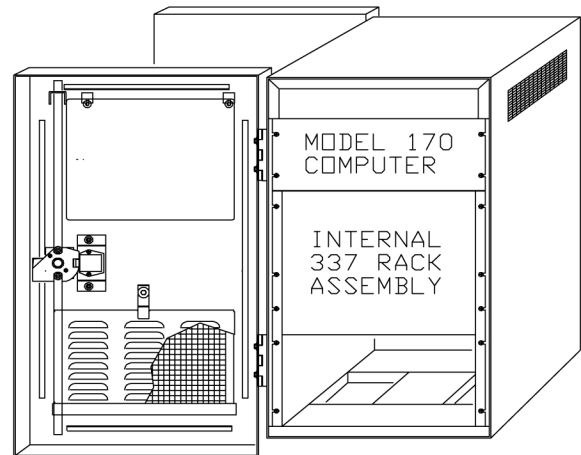

The Internal Rack Assembly is removable and free-standing for ease-of-maintenance.

The thermostatically-controlled fan and filtered door vent furnish cabinet ventilation.

The Power Distribution Assembly contains a ferro-resistant power supply, four circuit breakers, and two switched for the Police Panel. The unit is modular and is easily removed or replaced.

The Input File houses up to eleven (11) two-channel input modules.

The Output File houses up to six switch pack modules. Each switch pack position can be programmed to flash red or yellow, as needed.
